

# SeoDev Spinner Instruction Manual

## What Is SeoDev Spinner Used For

As the title says, SeoDev Spinner is used for spinning text content into many variations for further usage, such as submitting spinned pieces of text to website directories, article directories, Web 2.0 sites, blogs and so on.

## How to Use SeoDev Spinner

SeoDev Spinner is very simple to use, as it has only one function, and everything is tailored to that function, that is to spinning content.

To use it efficiently you just have to prepare a text in advance, so that you have to only copy and paste it into SeoDev Spinner text field (surely, you can do all the writing work inside the software, so it's up to you which method to choose). Remember, that the more variations of words, phrases, sentences, and even paragraphs you use, the more unique texts the more love from search engines you will get.

The software uses special formatting for spinning content. You may have already used it as this type of formatting is the most common for spinners.

The formatting is the following: **{word1|word2|word3}**, where “{“ and ”” define the beginning and the end of a piece of text that would be spinned, and “|” divides the variations that will be rotated while spinning. You can come up with variations not only separate words, but for phrases, sentences, and even paragraphs as well.

Here's an example of how you should prepare a text to get the best results:

{{A question | A query | An inquiry} I get asked {all the time | day in and day out | daily | frequently | every now and then} is what are the benefits of {acai berry | acai berry products | acai superfood | acai super fruit | acai berry juice | acai berries | acai berry fruit | acai extract}? | So what are the benefits of {acai berry | acai berry products | acai superfood | acai super fruit | acai berry juice | acai berries | acai berry fruit | acai extract}? | What are the benefits of {acai berry | acai berry products | acai superfood | acai super fruit | acai berry juice | acai berries | acai berry fruit | acai extract} is it really a superfood?} {The {benefits | nutrition benefits | body benefits | health benefits} are numerous, a {quick | fast} search of the internet and you will find lots of sites out there talking about the {acai berry | acai berry products | acai superfood | acai super fruit | acai berry juice | acai berries | acai berry fruit | acai extract}. | You will find many {sources | references | articles | reviews} about the benefits of acai on the internet. | There are many {benefits | nutrition benefits | body benefits | health benefits | gains} to taking {acai berry | acai berry products | acai superfood | acai super fruit | acai berry juice | acai berries | acai berry fruit | acai extract} just check out

the {internet | reviews | references on the internet | articles on the internet} to {determine | discover | see | learn | decide | ascertain} what this berry is all about.}

As you can see, you should come up with as many variations for as many words and phrases as you can.

And here's what you can get if you prepare your texts like this:

What are the benefits of acai berry is it really a superfood? The nutrition benefits are numerous, a quick search of the internet and you will find lots of sites out there talking about the acai berry products.

\*\*\*

A query I get asked every now and then is what are the benefits of acai berry products? You will find many sources about the benefits of acai on the internet.

\*\*\*

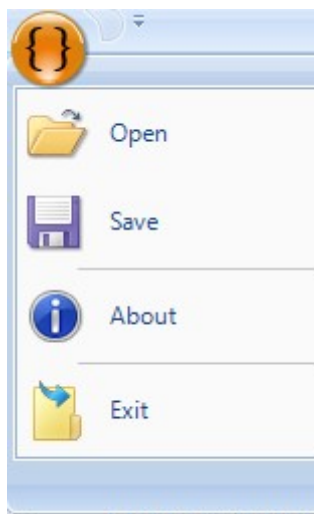

A query I get asked frequently is what are the benefits of acai berry? There are many gains to taking acai berry just check out the articles on the internet to see what this berry is all about.

Pretty different texts, aren't they?

## SeoDev Spinner Interface

The interface of SeoDev Spinner is user-friendly and intuitive, but anyway we, as developers, should tell you everything about the software so that you have no problem at all when using it. So, let's start.

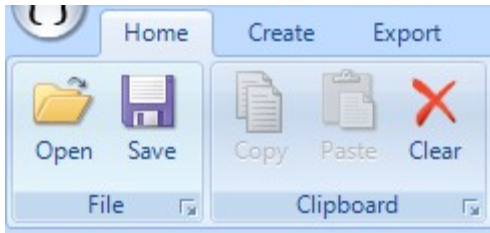

When you click on the top left round button, you will see the following buttons:

- **Open** – open a text file from your hard drive.

- **Save** – save a new project.
- **About** – information about the software.
- **Exit** – exit the software.

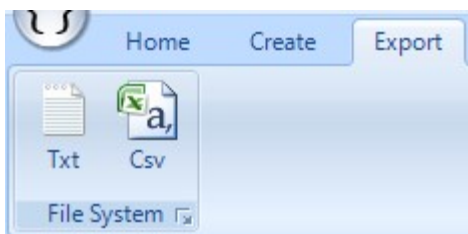

Now the main menu:

- **Open** – open a text file from your hard drive.
- **Save** – save a new project.
- **Copy** – copy the selected piece of text to the buffer.
- **Paste** – paste the copied piece of text from the buffer.
- **Clear** – clear the both text fields of the software.

- **First** – get only the first variation, obtained from spinning your text.
- **Random** – get the random variation, obtained from spinning your text (if you click this button several times, you'll get a new variation each of time).
- **50** – get 50 variations.
- **100** – get 100 variations.
- **500** – get 500 variations.
- **1000** – get 1000 variations.
- **User Defined** – get a specific number of variations, up to 10000.
- **All** – get all the variations possible (use this only for small texts with a small number of variations or the software will overload your processor).

- **Txt** – export results of spinning to .txt file.
- **Csv** – export results of spinning to .csv file.
